Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5-12 and 15-22 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,542,605 to Campau.

Campau shows a flow delayed flow reservoir and cap as seen in Figs. 2-4, having a hand held water container 20, a seal 30 covering a container opening 22, the seal having a first hole 70 and a second hole 31 where the first hole is smaller and offset in a vertical direction relative to the second hole, a cap 50 having a delay chamber 53 and a drain opening 48 on a tower 51 wherein water flow from one of the seal holes to fill the delayed chamber before following out to the drain opening, the tower is covered by a tube 40.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,542,605 to Campau in view of US Patent Application Publication US 2003/0126691 A1 to Gerlach et al.

Campau shows all claimed limitations as discussed above and performs the method of filling the container with water in an upright position, attaching the cap to the container, turning the container over to a downward dispensing position, flowing water from the container through the first hole in the seal into the chamber in the cap, passing air from the cap through the second hole in the seal and into the container, Campau is silent about placing the container into a drying cabinet. Gerlach shows a container 106 as seen in Figs 8 and 6, placed in a cabinet for in-home fabric treating. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to place the container of Campau in a cabinet as taught by Gerlach to provide humidification to a single desired article in a closed spaced, see page 3, lines 3-11.

Allowable Subject Matter

5. Claims 3, 4, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bibb shows an oilcan. Greening shows a fluid flow control valve. Chaney shows a bottle with hydrostatic passage. Jane shows a portable humidifier.
